EMERGING MARKETS FUND INVESTOR CLASS

The Fund is designed to benefit from opportunities for future economic growth in the world's emerging market countries. Portfolio holdings are principally in securities issued by large emerging market companies across the globe, or whose businesses are closely associated with developing countries. Up to 20% of the investment portfolio of the Fund may include securities issued by developed market companies, as well as less developed countries, such as frontier markets.

Performance data is based upon past performance, which is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Please call 1-800-811-0535 to obtain performance data as of the most recent month-end. The Fund imposes a 2% redemption fee on share held less than 60 days. Performance data does not reflect the redemption fee. If reflected, total returns would be lower.

Mutual fund investing involves risk. Principal loss is possible. Investing in international markets may involve additional risks, such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. These risks are greater for emerging markets. Investments in small and mid cap companies involve additional risks such as limited liquidity and greater volatility.

You should consider the investment objectives, risks, charges and expenses of the Fund before investing. For a statutory or summary prospectus containing this and other information, please call 1-800-811-0535 or visit www.thomaswhitefunds.com. Read it carefully before investing.

Fund holdings and sector allocations are subject to change at any time and are not recommendations to buy or sell any security.

Earnings Growth is not a measure of the Fund's future performance.

¹Total return includes reinvestment of dividends and capital gains and reflects fee waivers/reimbursements, in the absence of which total returns would have been lower.

² The MSCI Emerging Markets Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of emerging markets.

P/E (Excluding Neg. Earnings): The Price to Earnings (P/E) Ratio reflects the multiple of trailing earnings from the last reported fiscal year earnings at which a stock trades. This ratio excludes companies with a negative or undefined P/E ratio.

P/E FY1 Est: The current fiscal year consensus P/E ratio estimate as reported by Institutional Brokers' Estimate System.

Price/Book: Ratio of a company's market capitalization divided by the company's total common equity book value as shown on its balance sheet.

3yr Earnings Growth: Annualized earnings-per-share growth rate over the trailing 3 years.

PEG Ratio: Calculated by dividing the P/E ratio by the trailing annual earnings-per-share growth.

Wtd Avg Mkt Cap: The weighted average of the market capitalizations of the companies whose securities are held in the portfolio.

Wtd Median Mkt Cap: The weighted median of the market capitalizations of the companies whose securities are held in the portfolio.
